ROYAL CARIBBEAN INSTALLS WYBRON INFOTRACE CONTROL AND MANAGEMENT SYSTEM ON NEWEST SHIP LIBERTY OF THE SEAS

Colorado Springs, CO – June 5, 2007 – Wybron, Inc., a leader of entertainment, houses of worship and architectural lighting technology, today announced that Royal Caribbean International has installed the InfoTrace Control and Management System on its newest Freedom-class ship, Liberty of the Seas. All of the company's 21 ships have utilized Wybron's Coloram products in their award winning theaters since the early 1990s.

InfoTrace is Wybron's award-winning RDM communication and management system that allows any DMX device to send information to the controller. On the Liberty of the Seas, it will allow the ship's production engineer to locate every RDM fixture in the theater, monitor and maintain them all from a single laptop. Going forward, any RDM compatible lighting equipment that Royal Caribbean installs in the ship's theater can be easily set-up, tested, maintained and integrated in the InfoTrace System.

"We are so pleased that Royal Caribbean chose to upgrade its newer Freedom-family ships with the InfoTrace system," said Larry Turner. "By installing the InfoTrace System and Coloram ITs, the company is the first cruise line to adopt the RDM protocol in their professionally lit theaters."

The IT components that are a part of the InfoTrace System installation on Liberty of the Seas include - 78 Coloram IT 4-inch models, 66 Coloram IT 7.5-inch models, 12 Eclipse II IT dimmers and 10 power supply units. The Liberty of the Seas theater is a two deck-high space equal in size to a Broadway theater.

Royal Caribbean is known for offering its passengers outstanding musical stage productions and headline acts in beautifully appointed theaters. By installing the InfoTrace System, the company will make it easier for the ship's production crew to easily keep track of and maintain all of the theater's lighting equipment.

The Liberty of The Seas accommodates up to 3,634 passengers. It set sail on its maiden voyage on May 19, 2007 from Miami. The third Freedom-class ship, Independence of the Seas, will be the second Royal Caribbean ship to use the InfoTrace System. It is scheduled to debut in Europe in May 2008.

TeleDimensions International Inc., a global integrator of audio, visual, broadcast and multimedia systems for land-based and marine venues, supplied and installed the InfoTrace System onboard the Liberty of the Seas. TeleDimensions International is currently working with Royal Caribbean International and AkerYards on the design of the next generation of ships.

About Wybron, Inc.

Wybron is advancing the art of lighting through collaboration with its customers across the entertainment, houses of worship and architectural markets. The company consistently develops state-of-the-art, award-winning solutions. Recognized as one of the world's leading innovators in the lighting field, the company's products are used in Broadway shows, including A Chorus Line, Beauty and the Beast, Chicago, Lion King, Spamalot and The Producers and in Las Vegas Blue Man Group, Cirque du Soleil KÁ and Spamalot. As well as the entertainment fields, houses of worship and commercial architects, Wybron also serves cruise ships, theme parks and casinos throughout the U.S. and across the globe.
